Eval Question

Rate the value of the session content.

How useful and relevant is the session content to your job/career?

How well did this session meet your expectations? If there were any areas, questions, and/or pain-points not addressed in this session, please list them in the comments.

How well did the session's Title, Abstract, Level, Technology Focus, Content Stream, and Audience align with what was presented? If this session was incorrectly assigned, please indicate the correct category or categories in the comments.

Rate the speaker's knowledge and expertise of the subject matter.

Rate the overall presentation and delivery of the session content.

Rate the balance of educational content versus that of sales, marketing, and promotional subject matter.

Stage was squeaky.
Definitely a higher level session. Excellent content.
I didn't bring it up in the session but managing the operational side of this, with cumulative updates and such, is really difficult. I don't think there's any answer though.
Very informative and great to have an example
It jumped a bit to fast between the internal methods and cognitive api.
It was a great session although it went so fast and I don't have the fundamentals down to understand it all. That's fine though because during startup we still need to understand the overall plan. I think the last spark section just needs to go. Also Trollhunters is amazing.
Great session! I loved the examples and feel like using this myself is more attainable now.

Very good speaker. What I saw in the presentation definitely inspired some out-of-the-box thinking for uses in my company.

The presentation went by very fast. It would have been nice to have more time with this topic. Well presented Hiram, especially for such a short and high level session.

<p>It went very fast, but it covered exactly the sort of real-world examples I was hoping for and since the downloadable content includes the step-by-step instructions of what he showed, I can repeat the steps on my own time and try my hand at building these same 3 Power Apps.</p> <p>To much info to fast.</p> <p>Awesome job. I like that I can take away and use this immediately</p> <p>A lot of material to cover quickly. Wish the session was longer</p> <p>My only comment is that his presentation should not included scripts where the text is light gray on a dark gray background. The contrast was so slight that it was hard to see on the projections. Text in a demo should have high contrast in order to be easily seen; so stick with a white background for this sort of presentation.</p> <p>Lots of content. Loved it!</p> <p>Sometimes it wasn't clear how the pieces were connecting together but overall very good session.</p> <p>excellent demos. clear and concise explanations. thank you.</p>
